

▼ EPA Electric Ultra-High Pressure Pumps

Maximum output pressure: 150MPa

Motor power: 1.1KW

Low pressure flow: 2.5L/Min

High pressure flow: 0.3L/Min

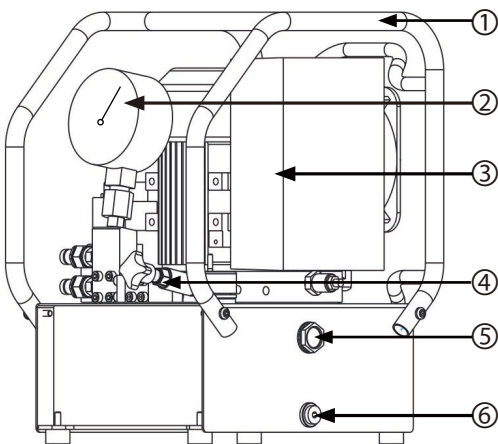

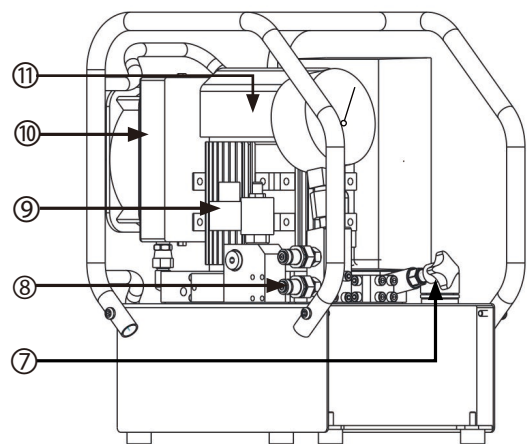

Available oil capacity: 5L

- Ultra-high pressure electromagnetic unloading, equipped with emergency manual unloading valve
- 6 meters double button wire control handle
- Pump built-in safety valve
- External lockable pressure regulator
- Brushless motor maintenance-free, low noise
- Gear pump, plunger pump structure, two-stage flow
- Efficient air cooled radiator, low temperature rise in continuous operation
- Integrated frame winder design
Easy control line storage
- Quick disassembly of pressure gauge without rotation
- Standard with two output interfaces

▼ EPA Type Specification Sheet:

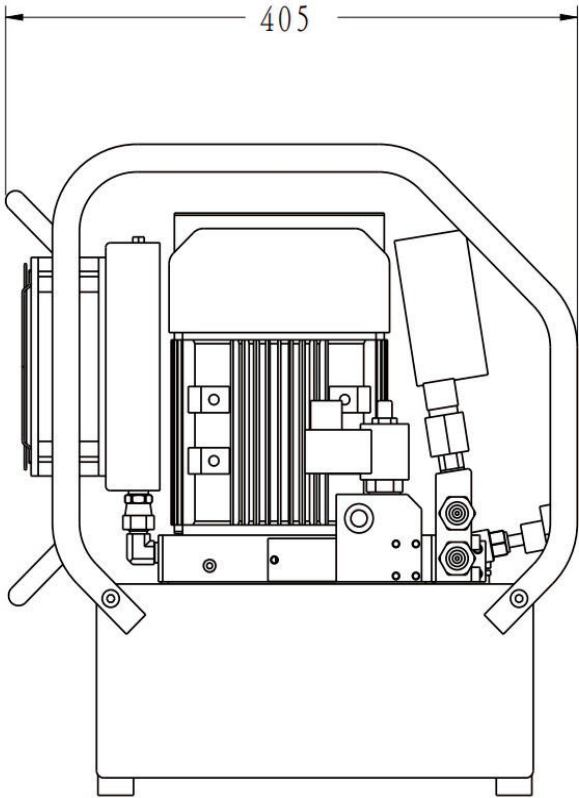

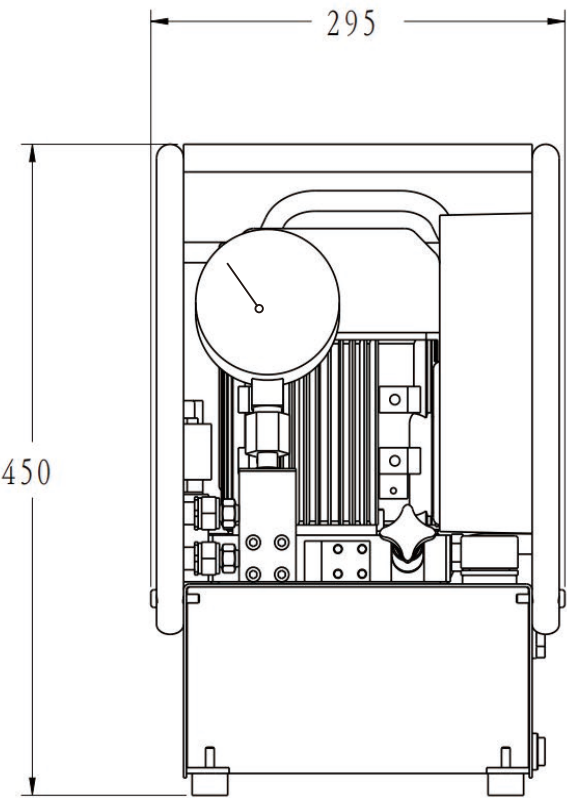

Model Number	Voltage	Motor Power	Low Pressure Flow	High Pressure Flow	Available oil capacity	Number of oil outlets	Weight without oil
EPA1500	230VAC	1.1KW	2.5L/Min	0.3	5L	2	30KG
EPA1500-115/60	115VAC	1.1KW	2.5L/Min	0.3	5L	2	30KG

▼ EPA Product Illustration:

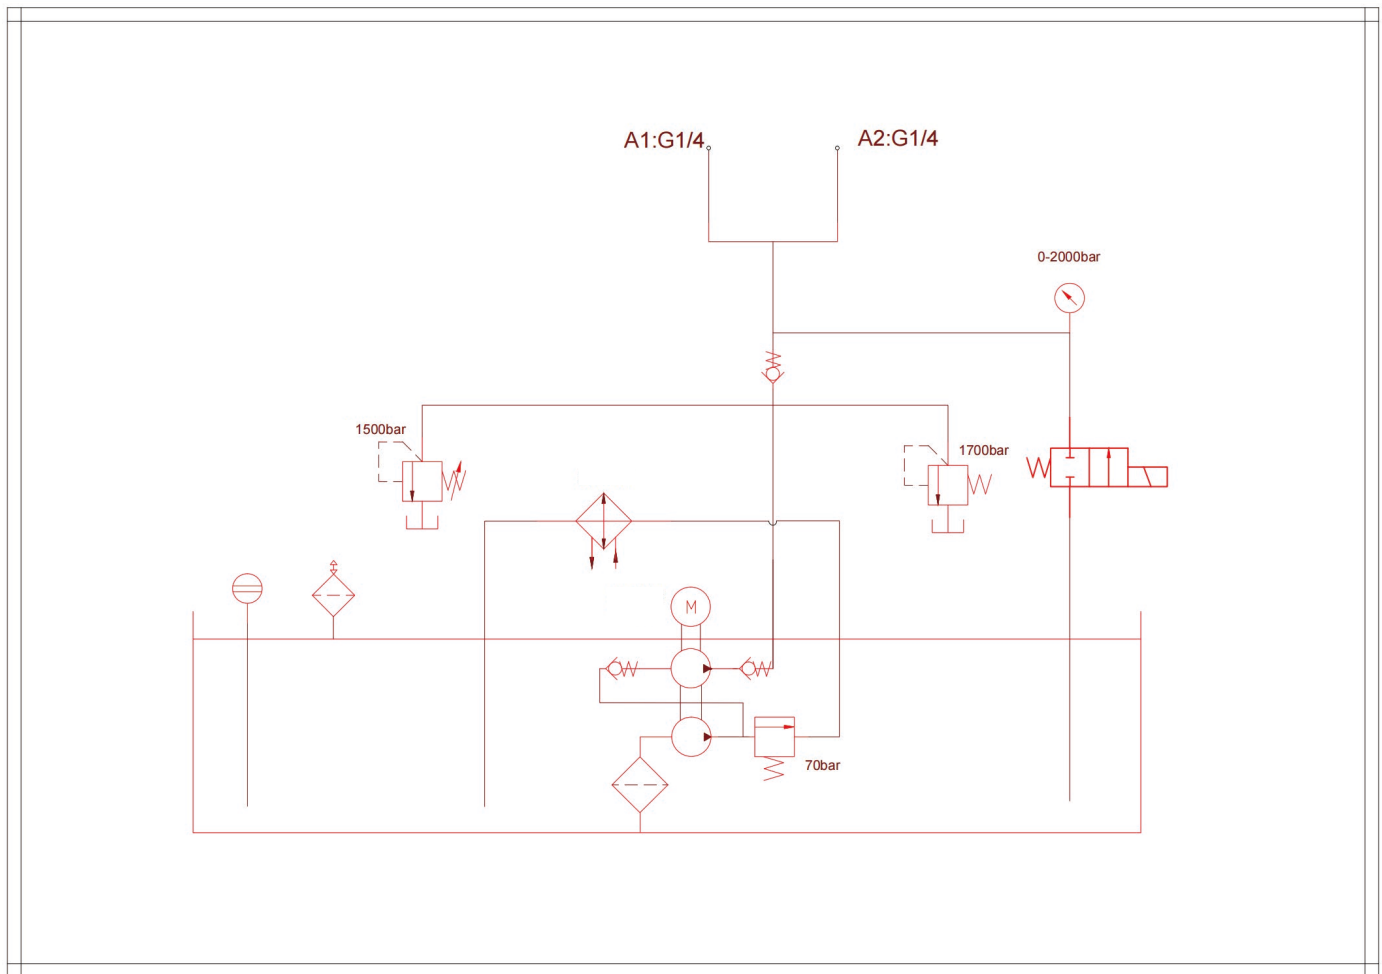

NO	Name
1	Protected Framework
2	Manometer
3	Electric Cabinet
4	Refueling And Exhaust Outlet
5	Oil Level Gauge
6	Oil Outlet
7	Relief Valve
8	Quick Interface
9	Electromagnetic unloading valve
10	Air cooled radiator
11	Power-Driven Machine
